- ✔ Tamper-resistant VAXSYS Card fits in any wallet.

Print Durable Smart Health Cards On-Site

1. Scan ID
2. Pull Vaccination Data
3. Print Durable Card

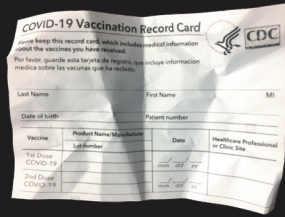

All in less than 2 minutes.

Available Now: Produce Durable, Equitable, and Secure SMART® Health Cards – via your FHIR® Accessible records Without the Need for a Smartphone/Digital Wallet

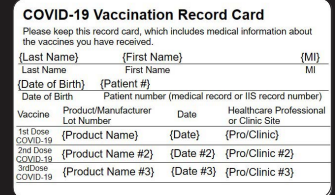

Multiple Issues:

- Paper vaccination record cards are easily damaged, an inconvenient storage size, and lack security features.
- Alternatives require a smartphone and data plan to access SMART® Health Card data via a digital wallet.

One Solution:

- Patient data capture from government-issued ID + verified vaccination records from an existing medical record = Printed wallet-sized PVC SMART® Health Card – that EVERY patient can use -from anywhere, at any age.

Provide verified and portable patient vaccination records by delivering a durable, secure, and convenient PVC vaccination record card at the time of vaccination - or any time after

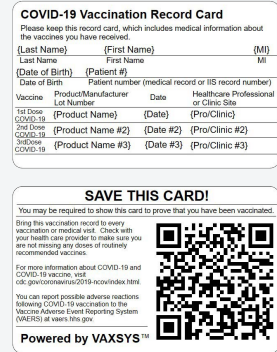

TC52X-HC Mobile Computer for quick accurate scanning

- Advanced scanning of government-issued ID's and vaccine vials to increase throughput
- Disinfectant-ready design
- Up to 14hr battery life

ZC350 mobile printers for reliable card printing

- Fast, reliable printing on both sides in one pass
- Easy to operate
- Convenient compact size
- High quality 300dpi print resolution

Durable, secure printed cards

- Durable PVC card – no bends or wrinkles
- Fits easily in a wallet
- Durable overlay protects against wear
- Security watermark provides counterfeit protection
- Renders a SMART® Health Card QR Code

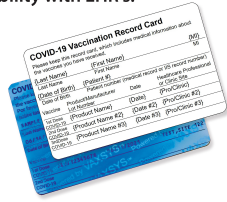

Discover the most accurate and efficient way to process patients and produce durable COVID Vaccination SMART® Health cards
